

# SAFETY FIRST!

SUPRABEAM KEEPS YOU SAFE

# MULTIPLE HELMET MOUNTING OPTIONS TO KEEP YOU SAFE AT WORK

ADHESIVE HELMET ADAPTER  
- M-SERIES

The Adhesive Adapter fits almost any helmet, and it will stay securely in place with the strong 3M adhesive pad. You can easily slide the multilamp in and out of the mount, if you need it handheld for closer inspections. Our development team has designed this mount specifically for the M-series and has found the perfect balance between a tight grip around the light, and easy mounting and dismounting. As a result, when using M6r and M6xr as a headlamp, it is easy to adjust the light angle to any situation you might encounter.

HELMET CLIP AND ADAPTER  
- S-SERIES

The helmet clip makes it possible to securely mount your S2, S3 or S4 on a safety helmet, using the mounting slot featured on most safety helmets. Fitting your safety helmet with a headlamp has several advantages, even if you work on a partly lit construction site or building, the light from the helmet will increase your safety and vision on the site. With the adhesive helmet adapter you will also be able to mount your S2, S3 or S4 on a helmet with no mounting slot.

The Helmet Clip for the S-series headlamps has been improved and is now UVEX approved! Fitting your safety helmet with a professional headlamp has never been easier.

In the European union there is written standard for how much light is needed when working at a construction site, the standard : EN 12464-2, states that on construction sites there needs to be between 20 lux to 200 lux of light available depending on the work handed out. If you would like to know more about the requirements for light on workplaces you are more than welcome to contact Suprabeam.

HELMET MOUNT

The helmet mount fits on safety helmets with a mounting slot on the side and can be used with Suprabeam torches from Q3 to Q7xrs. The mount's unique design can be angled to a preferred position and is firmly secured by the thick rubber band.

FAST RAIL MOUNT

The FAST rail helmet mount fits on ballistic helmets with FAST rail system. You can easily slide the mount into place and secure your Suprabeam torch with the thick rubber band. The mount can be adjusted to your preferred position and is compatible with torches from Q3 to Q7xrs.

# PACKAGING

The design of the new accessory bags matches the new packaging perfectly, and looks stunning together on the shelves. The new accessory bags and labels are both made from recyclable paper, making it easy to recycle in a paper container.

Size: Height: 17 cm, Width: 11 cm, Depth: 4 cm

\* Some of the products will still be delivered in the old packaging until the old packaging is out of stock.
