NEW!
HEADBAND INCLUDED

**ENDLESS
 MOUNTING
 OPTIONS**

When the terrain gets rough the B6r can be mounted on your helmet using the included adhesive mounts. With the B6r guiding the way, you can confidently tackle even the most challenging forest terrain.

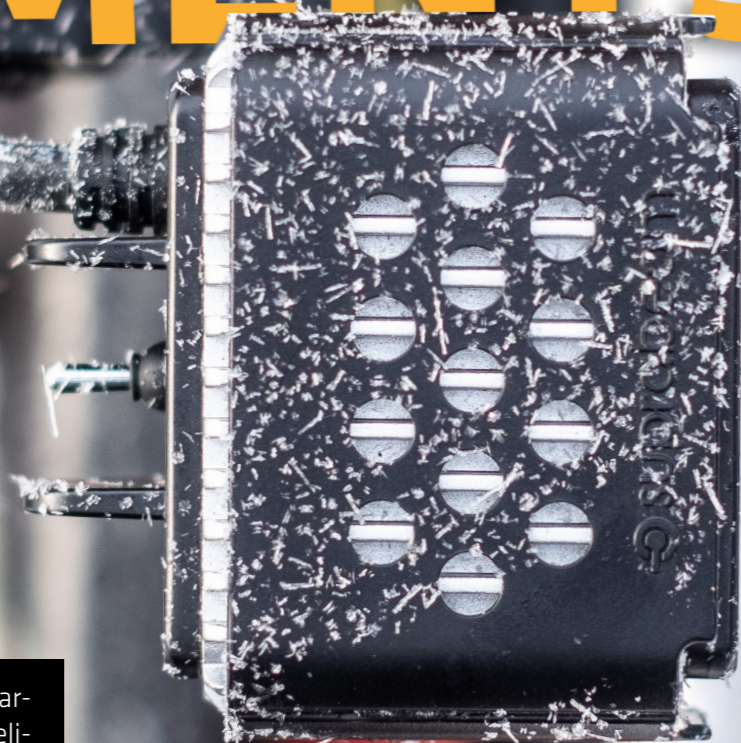

The industrial grade bajonet plug system ensures an ultra-strong connection that will never fail you. When the cables are connected the locking mechanism automatically clicks into place and creates a tight connection, securely protected from water and dirt.

 INTERFACE**

THROUGH THE ELEMENTS

With its waterproof IP65 rating, the B6r fearlessly withstands the elements, ensuring reliable performance even in the harshest conditions. Rain, mud, or rough terrain – nothing can stop the B6r from lighting the way on your adventures.

EASY POWERPACK MOUNTING

The Powerpack mounts on the frame with the included Powerpack pouch. Simply place the Powerpack inside the pouch, wrap the lid around the frame and tighten the straps

QUICK RELEASE MOUNT

4200 LUMENS

At its core, the B6r is a powerhouse, with an impressive 4200 lumens that pierce through darkness with ease, illuminating your path and ensuring you never miss a detail.

KEY FEATURES / UNIQUE SELLING POINTS (USP)

EASY AND FAST MOUNTING

The powerpack pouch can quick and easily be mounted on any bike frame, due to the universal design. Simply wrap the lid around the frame and tighten the straps securely.

NEW HEADBAND

With the new headband mount, the B6r easily transforms into a headlamp, offering hands-free illumination for your forest adventures. With the included extension cable you can move most of the weight to a backpack.

VERSATILE MOUNTING

With the adhesive mount set, you can easily mount the B6r on a large range of surfaces. This gives you an endless amount of mounting options to fit your needs.

RAM AIR COOLING SYSTEM

Performance cooling system for maximum power output. The solid aluminium housing with innovative cooling ribs absorbs the heat from the LED's and transfers it to the air.

SEPARATE ON/OFF SWITCH AND TOGGLE SWITCH (5 LEVELS)

Accidentally turning off the bike light while riding fast at night is the worst case scenario, so by separating the on/off and the light level switch we have completely removed that risk.

GoPro MOUNT

The GoPro mount allows you to use the B6r with all GoPro compatible mounts; like the head band, helmet mount or chest mount.
