KEY FEATURES / UNIQUE SELLING POINTS (USP)

SMART INTERNAL CHARGING

The USB-C connected charger for the Q5xrs defend is designed to be mounted hanging on a wall or installed in a vehicle, making it effortless to hang in your Q5xrs defend for charging.

ROTATING HOLSTER

The new Q5xrs defend features a 360-degree rotating holster with a clip designed specifically for MOLLE mounting slots. This smart holster allows you to operate your Q5xrs defend hands-free, pointing it in any direction to light up your environment effortlessly.

EMERGENCY LIGHT FUNCTION

When released from the charger or during a power outage, the Q5xrs defend will switch on immediately, providing instant illumination. This amazing feature ensures that you are never left in the dark.

HIGH CAPACITY BATTERY

The battery inside the Q5xrs defend is a high capacity 18650 Li-ion cell with 3000 mAh of capacity. The large battery capacity is essential as the battery is charged inside the torch, and therefore it is able to power the torch for a long time before it needs recharging.

SLIDING HYPERFOCUS™

The sliding Hyperfocus™ optical system collects the LED radiance and distributes it with maximum efficiency from a perfect round floodlight beam to a highly intensive, long range spot beam. All just by one-hand sliding of the head.

TACTICAL FRONT AND BACK

Use the strike bezel for self-defense or as an easy way to locate your torch in the dark. When switched on and placed upside down on a table, it will light up around the tip of the head. The tactical tail cap is carefully shaped so that it can be used to break light surfaces. You will also be able to use it for self-defense.
