Dots For Effortless  
Wearing**

**Exchangeable Battery  
With Integrated USB-C Charging**

**New Larger Headband  
Mount For Improved  
Comfort**

**suprabeam®**  
Danish Design | Swiss Engineering

# Here's what's new:

## Proactive Safety Sensor:

The improved proximity sensor now dims the light to 50 lumens when objects are detected too close to the light. This intelligent feature prevents accidents, ensuring your M6xr remains safe from damage and avoids harming any nearby objects.

## USB-C Charging:

Enhanced Charging Convenience: Say goodbye to the Micro-USB charging port and welcome to USB-C! Our R&D worked hard for not only integrating USB-C, but also keeping the length of the battery so it can be inserted to all older M6r/M6xr! Sustainability and service to existing customers is extremely important to us.

## Larger Headband Mount:

The new larger headband mount on the M6xr headlamp significantly enhances comfort for users. Designed with an expanded, ergonomic fit, it distributes the weight of the headlamp more evenly across the forehead. This reduces pressure points and minimizes discomfort during extended use.

## Anti-Sweat Silicone Dots:

The new and improved headband, featuring innovative silicone dots, offers a dual advantage of preventing slipping and it reduces sweating. The strategically placed silicone dots create a grippy surface that holds the headlamp securely in place enhances breathability by allowing air to circulate more freely.

## New Packaging:

Eco-Friendly Packaging: In our continued effort to reduce our environmental footprint, the M6xr will now be delivered in 100% plastic-free packaging. This new packaging is not only more sustainable but also 44% smaller than before, significantly reducing transport space and impact on the environment.

**44% SMALLER**

## New Partnumbers and EAN-Codes:

Part. No.:	M6xr: 526.6111 / Battery: 950.029
EAN-CODE:	M6xr: 5704049911628 / Battery: 5704049911383
