## UNIQUE SELLING POINTS (USP)

### SLIDING HYPERFOCUS™

The sliding Hyperfocus™ optical system collects the LED radiance and distributes it with maximum efficiency from a perfect round flood light beam to a highly intensive, long range spot beam. All just by one-hand sliding of the head.

### DIMMING + MEMORY

The new electronic task switch combined with our new dimming control, offers simple and stepless power adjustment from 380 down to 10 lumens. It memorizes the last used light output and with one single click it activates maximum power again.

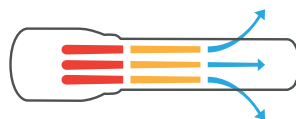

### ERGONOMIC TASK SWITCH

The tactile ergonomic task switch is easy to operate and gives you a tactile feedback. The electronic task switch with solid silicone cover is specially designed to have a long lifetime.

### INTELLIGENT LIGHT CONTROL

The advanced electronic micro controller offers dimming of the light power by simple switch operation. In addition, it controls the light output for optimized battery lifetime.

### COOLING CORE

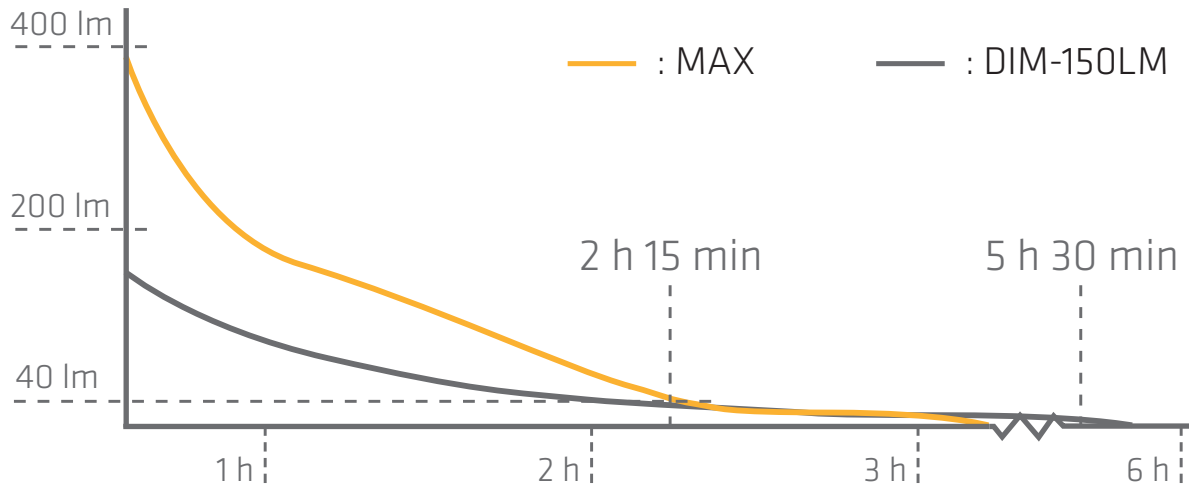

The Power LED is mounted with "heat-sink technology". The heat is diverted throughout the core structure. Therefore, you will be able to get maximum output for a much longer period of time.

### WATER RESISTANT - IPX4

The Q3 is rated IPX4, which means it is water resistant. Use the Q3 in all weather conditions without having to worry about your light.
