## KEY FEATURES / UNIQUE SELLING POINTS (USP)

### SLIDING HYPERFOCUS™

The sliding Hyperfocus™ optical system collects the LED radiance and distributes it with maximum efficiency from a perfect round flood light beam to a highly intensive, long range spot beam. All just by one-hand sliding of the head.

### DIMMING + MEMORY

The new electronic task switch combined with our new dimming control, offer simple and stepless power adjustment from 400 down to 8 lumens. It memorizes the last used light output and upon one single click it activates maximum power again.

### 3 BATTERIES VS. 4 BATTERIES

The Q4 is using 3xAAA alkaline batteries but has the same performance as most torches using 4xAAA alkaline batteries. In daily life this means that you and the environment save a battery each time you would have to change batteries, without compromising performance.

### PROFESSIONAL POUCH

Keep your Q4 within grasp at all times with the included belt pouch. With the sturdy and reliable nylon fastener, there is no need to worry about your Q4 falling out.

### COMPATIBLE WITH NiMH

The Q4 is compatible with rechargeable NiMH batteries. If you are a heavy user, you can save a lot of money on alkaline batteries, using rechargeable NiMH batteries instead.

### ELECTRONIC SWITCH

The Q4 is equipped with an intelligent electronic switch, that makes it possible for you to adjust the light level precisely for your needs.
