KEY FEATURES / UNIQUE SELLING POINTS (USP)

TACTICAL TAIL CAP

The tactical tail cap is carefully shaped so that it can be used to break light surfaces. You will also be able to use it for self-defense.

DIMMING + MEMORY

The new electronic task switch combined with our new dimming control, offer simple and stepless power adjustment from 400 down to 8 lumens. It memorizes the last used light output and upon one single click it activates maximum power again.

3 BATTERIES VS. 4 BATTERIES

The Q4defend is using 3xAAA alkaline batteries but has the same performance as most torches using 4xAAA alkaline batteries. In daily life this means that you and the environment save a battery each time you would have to change batteries, without compromising performance.

PROFESSIONAL POUCH

Keep your Q4defend within grasp at all times with the included belt pouch. With the sturdy and reliable nylon fastener, there is no need to worry about your Q4defend falling out.

SLIDING HYPERFOCUS™

The sliding Hyperfocus™ optical system collects the LED radiance and distributes it with maximum efficiency from a perfect round flood light beam to a highly intensive, long range spot beam. All just by one-hand sliding of the head.

ELECTRONIC SWITCH

The Q4defend is equipped with an intelligent electronic switch, that makes it possible for you to adjust the light level precisely for your needs.
